Please note that the contribution rate may change in future depending upon the experience of the scheme. It is necessary to carry out the Actuarial Valuation periodically. It may be noted that the above results are as per the Actuarial Valuation which is based upon certain assumptions about future experience of the scheme. Further, the results are particularly sensitive to the difference between assumed valuation rate of discount and the assumed rate of escalation in salary.

The valuation is done on the basis of members data.
