College of Engineering

ESTD - 1928

(Jain Gurukul) Neminagar, Chandwad, Dist. Nashik (MS)

VISION

Transform young aspirant learners towards creativity and professionalism for societal growth through quality technical education.

MISSION

- To share values, ideas, beliefs by encouraging faculties and students for welfare of society.
- To acquire the environment of learning to bridge the gap between industry and academics.
- To enhance diverse career opportunities among students for building nation.
- To transfer the suitable technology particularly for rural development.

॥ गुरुकुल संस्कार एवम् आधुनिक शिक्षा ॥

Department of Computer Engineering

VISION

To empower young generations for significant contribution in the field of computer engineering through excellence in knowledge, technical education and innovation to cater the industrial demands and societal needs.

MISSION

- To achieve academic excellence by inculcating basic and latest knowledge in which new idea flourish.
- To undertake collaborative training which offer opportunities for long term interaction with academia and industry.

॥ गुरुकुल संस्कार एवम् आधुनिक शिक्षा ॥

FROM HEAD OF DEPARTMENT CORNER

DR. M. R. SANGHAVI

It gives me great satisfaction to welcome you all on behalf of the entire Computer engineering department.

Happy to share the release of **Computer Buzz**, Vol-7 Issue-2. Dedication, Devotion and Determination are keys to success in any endeavor. With the due respect Department of Computer Engineering believe in the philosophy of "Learning by Doing".

It is heartening to see the transformational programs of our government such as Digital India, Skill India, Stand-Up India. In the same context our department has adopted the practical solutions based on '**Digital Theme**'.

This magazine is intended to bring out the hidden literary talents in the students and teachers to inculcate strong technical skills among them. I congratulate and thank all the students and faculty coordinator who have made untiring efforts to bring out this magazine. I wish them all the very best for releasing more such magazines in future.

चांदवड अभियांत्रिकीत प्राध्यापकांसाठी त्याख्यान

चांदवड । येथील एसएनजेबी संचालित स्व. कांताबाई भवरलालजी जैन अभियांत्रिकी महाविद्यालयातील संगणक विभागातर्फे प्राध्यापकांसाठी 'प्रभावी संशोधन लेखन व संशोधन निधी योजना' या विषयावर

एकदिवसीय व्याख्याने आयोजन करण्यात आले होते. शिक्षणामध्ये लवचिकता आणण्यासाठी नवीन राष्ट्रीय शैक्षणिक धोरण मंजूर करण्यात आलेले आहे. यात संशोधनाला जास्त वाव देण्यात

आलेला आहे. त्या अनुषंगाने प्राध्यापकांना प्रशिक्षण देण्यासाठी या व्याख्याने आयोजन करण्यात आल्याचे याविषयी माहिती देताना प्राचार्य डॉ. कोकाटे यांनी सांगितले. यावेळी डॉ. मनीष कोकरे यांनी

शैक्षणिक तांत्रिक लेखन कौशल्य वाढविणे, संशोधनाची नैतिकता समजून घेणे याविषयी प्राध्यापकांना मार्गदर्शन केले. कार्यक्रमाचे संयोजन डॉ. ख्याती निर्मल व प्रा. के. एम. संघवी यांनी केले.

ARTICLE ON ARTIFICIAL INTELLIGENCE IN CYBER SECURITY

- SAGAR SHARMA, TE-COMP B, SNJB'S COE, CHANDWAD

Living during a digital world with tremendous advancement in the world of technology is at a very high level where every single device is connected to the internet with the internet of things (i.e. IoT). Since technology is reaching a high-level day by day, issues associated with cyber security are also increasing, becoming one among the biggest factors to be worried about. People are becoming digital citizens and are being more connected to the internet than ever, which is leading to security attacks, breaches in security and plenty more threats in cyberspace that are becoming more and more difficult to handle by humans alone. there's a need for protection from these cyber threats and to be secured. This article will introduce how the problems of cyber security can be efficiently resolved using the strategies involving AI.

Today artificial intelligence has already entered fields like Industries, Hospitals and Medicines, Aviation Human Resources, Government, Marketing, media, E-commerce, Gaming and Cyber security which may be a need in today's digital world. AI is heavily utilised in robotics. Advanced robotic arm and other industrial robots, widely utilised in modern factories, can learn from experience the way to move efficiently despite the presence of friction and gear slippage. Not just the corporates but also the govt sectors are also trying to master AI and Machine Learning for the protection of data and creating more opportunities in the respective field. The thought of creating and using artificial intelligence is to make human lives easier. Development of AI has begun with the intention of developing Intelligence in machines similar to that of humans.

AI allows you to automate the detection of threat and which is completed without any involvement of the humans. With the advancements in AI, many companies have begun to use it as a powerful weapon against cyber-attacks and breaches. Numerous computing methods of AI like Computational Intelligence, Neural Networks, Machine Learning, data processing , Pattern Recognition, symbolic logic , Heuristics, Artificial Immune Systems Intelligent Agents etc. are increasingly playing an important role in cyber-crime detection and security.

METHODS/TECHNIQUES USED OF AI IN CYBER SECURITY

Methods used of AI in Cyber

EXPERT SYSTEMS

An Expert System basically refers to a computing system that replicates the decision-making ability of a human being. Expert system may be a popular AI tool which is a best example of a knowledge-based system. It can be shortly introduced as programming for discovering answers to inquiries in some application area displayed either by user or by another product. The safety expert systems precisely follow a set of protocols to battle cyber threats.

NEURAL NETS

Neural Nets are a complicated part of Artificial Intelligence. It's also said to be deep learning. Neural nets or artificial neural networks are inspired from biological neural networks or functions and dealing of the human brain. The human brain features a large number of neurons, which are to an excellent extent general purpose and independent of domain, they will take in any kind of information. In 1957 Frank Rosenblatt created a man-made neuron (Perceptron) which introduced the concept of neural networks. Once we practically apply this deep learning or neural nets into cyber security, the system can identify whether a file is malicious or legitimate without human interference. This reduces human efforts.

INTELLIGENT AGENTS

Intelligent agent may be a system that perceives its environment and takes actions to maximize its chances of success. Computer Agents (software or hardware) are designed to perform operations computationally demanding tasks like information filtering, classification, pattern/trend analysis then on. Intelligent agents can collect data, analyze it and perform harder tasks where machines need to sense human intentions and decoding crucial information. In the future, this sort of system can help law enforcement in detecting and eliminating cyber threats, abuse, spam.

CONCLUSION

Artificial intelligence will help us in reducing cyber threats and the chance of reaching accuracy with a greater degree of precision is a possibility. Detecting complex security incidents is going to be easier without involvement of humans which will reduce human efforts. In future, we may have the cleverest frameworks using these AI methods. AI is going to be considered as a silver bullet to fight against cyber-crimes which will ease administration.
