No

.

Nothing

No

No.

-

..

No suggestion

No suggestion

NA

.

Practical based learning and simultaneous field visits we want out of nsk.

Thank you

Staff only focused on theory what about the mandatory things . Didn't get any idea about internships about choosing the carrier path. Extra curriculum activities should be their like other colleges. Not a single activity is done throughout the year only days and space activity. Not that much satisfaction 😞

Teaching is not well can't understand teacher what was studied

no

Bo

Practical teaching staff should be best

Noo

1. Firstly The Internet Signal Strength Must Be Good In The Classrooms.
2. All The Classrooms Compulsarily Must Have Smart TV's For Teaching Instead Of Traditional Projectors.
3. Submission Must Be Done On Time, It Mustn't Delay Very Much.

Teachers should try to communicate the topics with student(should be using day to day life examples)

Unfair in internal marks evaluation...it is totally affect on semester results...i experienced in privious semestermy theory marks is same as topper students but there is big difference in sgpa

- 1) Teachers should take the surprise test after complete at least 2 unit

Na

Our teaching was very well.

Instead of theoretical teaching practical teaching should be consider

Not any suggestions

Practical knowledge or examples related to real world applications must be provided while teaching

Focus on practical experience not a theory

You have to give students to do something new and help them.. And remove the 75% attendance criteria, because of this attendance criteria students cannot focus on their internal skills only focus on studies that is not helpful in next day today life by my POV.And you have to arrange the special session that helpful for students not for showing records that we have do this that..

-

be polite with students...teachers have to understand students problems and have to help them to overcome.....instead of this teachers give extreme trouble to the students during practicals and submision

No comments

- 1) DSA should be taken thoughroutly because teachers and staff should need a practical knowledge first and then get to theory ,easy and concept clearing codes should be taken to build confidence about dsa
- 2) Mpl practical should thoroughly be restricted if there is only harasment by teachers, if necessary that teacher should only be removed in my suggestion because no soft speaking,

harshly using any wrong word about our character

3) Internships with paying students should be prompted everytime when we talk about them, thorough strong resume projects must be taken in list firstly for insternship . Stipend paying companies to students must be searched and approached

Nil

Access of online library must be available as well as should be aware to students to get use and easy access of it from any where

Nothing!

- 1) Training and placement cell shoul be active from first year
- 2) improve interaction of students with placement cell
- 3) Need of improvement in sports section
- 4) teaching process as orientated to skills that are required for job opening
- 5) At least one day in a week should be off for the uniform
- 6) Institute should think about to add some content to learn about foreign language

1. Teachers should teach us some practical knowledge, and not just focus on completing their syllabus.
2. As an MBA student Industrial visit and case studies are the must but in our case in this institution they are the least priorities.
3. There should be efforts to develop leadership skills/Quantities in students and should focus little more on extra-curricular than syllabus completion.

The teacher are not able to identify the weakness of students.

It will be more feasible if techer focus on real life application of the topic which they are teaching.

Good

Good experience

1. Interactive Learning Platforms: Implement interactive learning platforms or online tools that encourage student engagement and collaboration. These could include virtual labs, discussion forums, or multimedia content to cater to different learning styles and make learning more dynamic and interactive.

2. Real-World Projects: Incorporate more real-world projects and industry collaborations into the curriculum. This will not only enhance practical skills but also provide students with valuable hands-on experience, preparing them better for the demands of the industry upon graduation.

3. Regular Feedback Mechanisms: Establish regular feedback mechanisms for both students and faculty to gather insights on teaching methods, course materials, and overall learning

experience. This feedback loop can help identify areas of improvement and ensure continuous enhancement of teaching quality and curriculum relevance.

Take a analytical subject lectures in the mornings so more students can show interests towards attendance. Thank You !

नाही

None

...

So harsh with students and no management worst

Yea

Actually our project topic is Android Application,
Ani nobody know about android
Most of the staff member can not support student

Teachers are not friendly
Convocations ceremony is not our college organized

Sometimes teachers behaviour is partial for some students. So please treat every student equally.

Everything is well and good.

Good learning experience

1. T & P Cell Improvement.
2. High - End PC's Requirements.
3. Extra - Curricular Activities Boost.

To improve the project based learning activities
Teachers knows the ability of students and some students is poor in studies to make them good in studies they have to good mentoring is required
More paper work are done by teachers students are not good benifit of this paper work that's why to improve the project work and decrease the paper work that's helpful to students for there practical knowledge.
