## HUMAN ANATOMY

### COURSE OUTCOME

2020-21

The course of Human Anatomy at first BHMS IS of one year taught in 200 Theory Lecture & 275 practical hours as per the guideline of central council of homoeopathy. Aim of this course is to provide student with comprehensive over view of the morphology & functional anatomy of the human body.

The course deals with normal structure & function of the human body & Provide an insight to the implication of disruption of normal structure and function. During the course the lecture will address with different resources for covering all the systems of human body.

In practical sessions students will have the opportunity examine prosecuted specimens and models of human body. This applied course provides students with skilled to prepare for clinical or health related careers. On satisfying the requirement of this course, students will have the knowledge and skills to –

1. Identify and describe the major structure
2. Discuss the structural organisation and functions of each system of the human body
3. Apply their knowledge of human anatomy to solve questions regarding function and disease
4. Analyse their knowledge and skill to create effective anatomy teaching and learning tools.

**Physiology including Biochemistry  
Course outcomes**

The course "Medical physiology including biochemistry, at I BHMS is of one year and taught in 200 lectures and 275 practical hours as per guideline of central council of homoeopathy.

The purpose of a course in physiology is to teach the functions, processes and inter-relationship of different organs and systems of the normal human organism as a necessary introduction to their disturbance in disease and to equip the student with The physiology is taught from the standpoint of description of vital phenomenon and the chemico-physical processes underlying them in health.

Physiology is science of body functions- how body part work. The body is actually a social order of about 100 trillions cells organize in to different functional structures, some of which are called organs. Each functional structure contributes its share to the maintenance of homeostatic ( Homeo-similar, static standing still) conditions in the extracellular fluid, which is called internal environment. As long as normal conditions are maintained in this internal environment, the body cells of the body continues to live and function properly. Each cell benefits from homeostasis, and in turn, each cell contributes it share towards the maintenance of homeostasis.

This reciprocal interplay provides continuous automatically systems loose their ability to contribute their share of function. When this happens, all cells of the body suffer. Extreme dysfunction heads to death, moderate dysfunction leads to sickness.

At the end of the course student will know-

- 1) Cellular function
- 2) Organ system function.
- 3) Integrate physiology fro the cellular and molecular level to th organ system and organicsmic level of organism.
- 4) How Homeostasis is maintained, i.e. control, feedback and regulations.
- 5) Normal standards or reference for use of diagnosing and treating deviations from normal.
- 6) Laboratory experiments in physiology and Bio-chemistry help understand the subject well.
- 7) As clinical examination is taught in physiology students must be able to do the examinations.

## COURSE OUTCOME HOMOEOPATHIC PHARMACY

At the end of 1<sup>st</sup> BHMS

- 1) Students should be able to demonstrate necessary practical skills related to Hom. Pharmacy in preparation of Hom. Medicines.
- 2) Students should be able to Understand Identification of various sources of Hom. Medicines.
- 3) Students should be able to Understand Taxonomical classification & rules of collection as well as preservation of the drug substances.
- 4) Students should be able to Demonstrate Dynamisation or Potentisation.
- 5) Students should be able to understand the Posology.
- 6) Students should be able to Understand Prescription Writing.
- 7) Through Industrial visit, students should understand Good Manufacturing practices. & Industrial Pharmacy
- 8) Drug proving.
- 9) Pharmacological study of drugs.
- 10) Students must see Homoeopathic Pharmacopoeia Laboratory- its functions and activities, related to quality control of drugs & finished products.
- 11) Legislation pertaining to pharmacy.

DEPARTMENT OF HOMOEOPATHIC MATERIA MEDICA

COURSE OUTCOME

1<sup>ST</sup> BHMS

1. Homoeopathic Materia medica consists of a schematic arrangements of symptoms produced by each drug on healthy human beings of both sexes and different ages
2. Study of drug in detail will enable a student to study each drug individually and as a whole and help in to be a good prescriber
3. By the end of 1<sup>st</sup> bhms , students must know about basic concept , construction , sources , classification (types) and scope and limitation of HMM

## Department of Pathology

### CO's of Pathology Department

- CO 1:- Student should be able to classify symptoms & diseases according to their Pathology & Microbiology
- CO 2:- Student should explain & Correlate Miasm & Pathology & Microbiology
- CO 3:- Student should be able to categorise pathological findings of disease in curable & incurable cases in practice
- CO 4:- Student should relate Pathology & Microbiology with Homoeopathic Materia Medica
- CO 5:- Student should demonstrate the application of knowledge of Pathology & Microbiology with initiative & judgement in advancing & interpretation pathological laboratory test in professional practice
- CO 6:- Student should be able to recommend preventive & awareness measures in pathological & microbiological outbreaks of pandemics & provide social service to mankind.

✓ A

Department of FMT

Course outcome

- Knowledge & application of the legal procedure and law in relation to medical practice.
- Understand the rules of writing & issuing the medical and medico legal reports and adapt skills to prepare it in professional practice as duty of doctors.
- Associate post-mortem findings of sudden, suspicious and unnatural cases to find the nature & cause of death and the medico legal aspect for the justice in criminal cases.
- Understand the methods of identification of the person and its application in medico legal cases.
- Knowledge of the methods of examination of victim and accuse, evaluation of findings and its application in medico legal cases.
- Knowledge of the duties of doctor towards patient, society & nation in ethical manner & motivate for continuous learning attitude
- Understand the toxicological effect of poisonous substance on the human being, evaluation of the symptoms, its application in management of case of poisoning, post mortem findings and medico legal aspect of the case.

## DEPARTMENT OF HOMOEOPATHIC MATERIA MEDICA

### COURSE OUTCOME

#### II BHMS

1. A student completing the course of 2<sup>nd</sup> BHMS he must know the basic concept , construction , and classification , types of HMM
2. Also he must know Science and philosophy of HMM
3. Different ways of studying HMM like -Physiological , pathologiocal , analytical , comparative and portrait study with comparative materia medica
4. A detail schematic study of 50 drugs from analytical, clinical , and comparative point of view
5. Commonly used drugs to be taught 1<sup>st</sup>
6. Application of materia medica should be demonstrated in their case studies recorded in their journals

PHILOSOPHY AND FUNDAMENTALS OF PSYCHOLOGY

COURSE OUTCOME II BHMS

- CO 1 To illustrate the examples of Natural cures and justify superiority of Homeopathic cures.
- CO 2 To Compare and contrast Homoeopathy with other systems of Medicine
- CO 3 To identify the different actions of Medicine
- CO 4 To classify clinically different types of diseases
- CO 5 To investigate the case. Individualizing examinations of patient.
- CO6 To identify and categorize different types of symptoms- Analysis of Symptoms
- CO 7 To prioritize different types of symptoms -Evaluation of Symptoms
- CO 8 To construct Totality of Symptoms
- CO 9 To synthesize the Portrait of disease for selection of Similimum
- CO 10 To name different terms of Psychology

### CO's of Dept of surgery

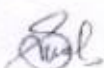

CO1. On successful completion of III yr. BHMS students will be able to diagnose common surgical condition and nonsurgical conditions.

CO2. Application of clinical knowledge to inspect & examine patient non accurately.

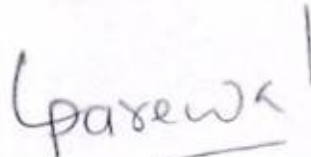

CO3 Students will be able to describe & explain common surgical instrument used in practice as well as knowledge of Investigation such USG. X Ray, pathological investigation to know the progress of disease i.e to know the disease homeopathically curable or non-curable.

CO4. Aim is to train students to Homoeopathic medicine in the management of surgical cases..

CO5. Understanding scope and limitation of homoeopathy in surgery as well as student should pertain knowledge of disease in incurable & emergency surgical cases.

Practice of Medicine

CO	POM COURSE OUTCOME (UG)
CO1	Knowledge of the disease condition in completeness with appropriate utility of homoeopathic fundamentals to cater medical help to the suffering mankind to restore health in most comprehensible and complete manner
CO2	The knowledge of homoeopathic medicine should be concrete on the aspects of responsibility, ethics of the medical practice so as to sense the health hazards and its safety issues.
CO3	The medical graduates must update the knowledge regularly and must always be earnest for exploring the best curable tools for incurables, providing the most beneficial and easily assessable service to the mankind.
CO4	Pliability in correlation amongst the different medical conditions resembling/ mimicking to reach the appropriate inference to cater medical help.
CO5	Achieve the position which will help merge the disease & medicine diagnosis for best possible cure and wellbeing.
CO6	Bore information which easily allow to reach the conclusion about disease curability and prognosis.
CO7	Must bear the information regarding medicolegality and responsibility to serve the mankind selflessly, socially wholeheartedly.

## DEPARTMENT OF HOMOEOPATHIC MATERIA MEDICA

### COURSE OUTCOME

#### IV BHMS

1. In the final year of the curriculum of UG curriculum student must know all the basic concepts and drugs studied in 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup> BHMS
2. He must know 122 drugs more in final BHMS some of which are polycrest and some short acting drugs
3. He must understand the concept of sarcodes - definition , indication , etc.
4. He must study the drugs in different aspects like clinical , therapeutic , group study , comparative study and also remedy relationship
5. He must be able to correlate the knowledge of MM to that of organon and repertory and clinical subjects
6. He must be perfect in case taking , forming the totality of symptoms and with the help of organon , repertory and clinical subjects must arrive at proper diagnosis , prognosis and management including posology
7. Must maintain a proper clinical case record of cases seen in OPD and IPD of our institute which will give him the necessary confidence for practice

**DEPARTMENT OF COMMUNITY MEDICINE**

**COURSE OUTCOME IV-BHMS**

CO 1: To explain the epidemiological approach to diseases with respect to – right diagnosis and right homoeopathic management appropriate to cases and associate the Concepts of health and disease.

CO 2: To interpret Bio-psycho-social-cultural-environmental-occupational and climatic factors which influence health and use of homoeopathy to keep community healthy by curative, promotive and preventive measures.

CO 3: To explain the epidemiological principles applied to diseases and associate application of Biostatistics with respect to use in practice and research

CO 4: To associate use of homoeopathy in Obstetrics, pediatric & geriatric practice with preventive and curative approach.

CO 5: To classify Hahnemannian concept of mental diseases and use of counselling in those cases.

CO 6: To summarize Hahnemannian concept of ancillary measures and nutrition as per individual case and list the health care and health education in community for control of diseases.
