

4.3.5 (QIM) In -person and remote access usage of library and the learner session /library usage program organized for the teacher and student (data for the preceding academic year)

The Repertory department has a computer lab with three computers and seven homoeopathic software, which can be utilized for teaching purpose. There are 10 computers in the Digital library, which are also used to teach Software to UG and PG Students.

1. Hompath MD
2. Hompath Wildfire
3. RADAR 9
4. RADAR Opus
5. Similimum Ultra
6. Kentian
7. Organon 96

As per the Syllabus of BHMS and MD (Homoeopathy), every student is trained during their clinical hours and clinical posting about all the Homoeopathic software mentioned above. The students are taught to repertorize and use different Homoeopathic Software repertories. The students are given opportunity to examine a number of patients during their clinical posting in the department and repertorize minimum of 25 cases with different repertories and cross check using Homoeopathic software repertories.

In Hospital with the help of LAN system of Homoeopathic Software connected with OPD and IPD medical officer and interns repertorize the cases with different homoeopathic software repertories, select the medicine and prescribe that medicine to the patient.

Homoeopathic software are already made available for teachers and students. The department gives consultancy to budding homoeopaths regarding use of and advances in homoeopathic software. The department gives emphasis on teaching of modern repertories including homoeopathic software repertories, as these are important in present day practice.

Details of the Software used

1. Hompath MD

Hompath is the most popularly used software amongst homoeopathic practitioners, teachers and students throughout the world. HOMPETH is the brainchild of **Dr. Jawahar Shah, M.D.** (Hom), Mind Technologies Mumbai, who recognized the immense power of computers as early as in the beginning of eighties and introduced the most revolutionary concept of computerized repertorization and searching the infallible Similimum in Homoeopathy. It is chiefly a product for the practicing Homeopath and P.G. students. It is complete software with much more information as compared to any other software available. Hompath MD comprises of 13 CDs – 17 modules, 29 repertories, 300 books, MM of 1437 remedies, keynotes of 477 remedies, compilation of 5000 cases and articles of masters' from various journals of past 100 years.

2. HOMPETH WILDFIRE

It is the next version of HOMPETH. It has 197000 pages of information with millions of permutations and combinations to find the correct remedy from.

It has more than 5000 cured cases which allow you to learn and to fall back upon for reference in difficult and pathologically advanced cases.

It has more than 5000 articles which are as old as 1890 and as recent as 2011, so it gives you wide range of experience, knowledge and wisdom of over a century of heritage right across the globe from 2800 authors.

It has latest Roger Van Zandvoort's Complete Repertory 2011 (CR2011) and Robin Murphy's Homoeopathic Clinical Repertory which makes finding a perfect Similimum easy.

It has got expert systems which have been developed based on 1000 of cases experienced by masters like Kent, Boeninghausen, Boger, Sehgal, Parinaz, Vijayakar and Scholten. These decision support systems give us a chance to view the same case differently and allow us to prescribe a correct medicine which can help 1000s of patients.

3. RADAR 9

RADAR software is developed by Archibel Belgium. Synthesis is the Repertory which is written by **Dr. Fredricke Schroyens** is linked to the RADAR project. It is based on the Sixth American Edition of Kent's Repertory, and contains all its rubrics and remedies. Since 1987, Synthesis has been used as a database for the RADAR program in the daily practice of leading homeopaths. It has been commented upon and thereby improved over and over again, which gives it an outstanding label of quality.

RADAR is an easy to use and powerful tool at the same time - special modules add functionality for a variety of homeopathic techniques. It contains three modules Vakil module, Herscure Module and Vithoukas Expert System.

With RADAR 9, One can find synonymous or related rubrics directly from the repertorization chart. In fact, the whole program has gone through a dramatic usability enhancement.

In fact, the program now offers total integration between Clipboard and Analysis. And Analysis is even further expanded by the addition of Families, Miasmatic, Boenninghausen's Concordances and Relationship of Remedy functions.

4. RADAR OPUS

It is the new version of RADAR containing Synthesis 2010 – the world's largest, most reliable and comprehensive homeopathic database – is available exclusively with RadarOPUS! Now expanded with new provings and remedies....

Synthesis 2010 and RadarOPUS combine in an open and flexible platform where one can choose how much – or how little – of the new information you include in your program.

Families, Kingdoms, Vermeulen, Scholten, Sankaran, Shore, Sherr, De Schepper... menu of homeopathic families are provided.

One Program, One Search over all resources: Repertory, Materia Medica, Patient Files, Personal Notes

With RadarOpus there's nothing to export, import, copy, or paste; no switching back and forth from one program to another. Simply type a word or phrase, click, and your RadarOpus program returns a list of results from your preferred list of sources!

5. SIMILIMUM ULTRA

SIMILIMUM ULTRA is a complete, user-friendly and state-of-the art Clinical Utility Software Package for Homeopathic Practitioners, developed by **Dr. Chandran K C**.

It is a versatile application that provides diverse types of innovative digital tools and platforms useful for any homeopath following any method in his day to day practice.

It is designed with such a flexibility and richness of contents and tools, that it adapts itself to meet the everyday changing requirements of any Homeopath to set up and run a fully computerized clinical practice.

Apart from the repertorization tools for practicing Classical Homeopathy such as Totality Method, Elimination Method, Combined Method(Totality + Elimination), Punch Card Method, Brick-Column Method Etc., SIMILIMUM ULTRA incorporates a RECOMBINANT METHOD of repertorization, based on Boenninhausen's principles of case analysis. More over, SIMILIMUM ULTRA presents a novel method of COMPARTMENTAL REPERTORIZATION, for those who intend to try the wonderful MULTI-SIMILIMUM METHOD of prescribing.

6. KENTIAN

This homoeopathic software is developed by **Dr. Ramanlal P. Patel** from Vadodara Gujrat. It has a built in Artificial Intelligence system. it does automatically the Analysis, Evaluation, and even classifies the Miasms too. The result screen displays the simillimum along with its miasmatic classification.

The built in Artificial Intelligence system automatically classifies the symptoms instantly even though you select symptoms in a random order. The program automatically classifies them to order by sorting them into Mentals, Physical Generals, and Particulars.

It also automatically does Analysis (automatic classification of symptoms in order of Mentals, Physical Generals, and Particulars).

It also evaluate symptoms (automatic classification of symptoms in order of Mentals: Will, Emotion, Intellect/Understanding, Memory, Dreams; Physical General, Pathological General, Pathological, Particular, Rare/Uncommon/Peculiar(Characteristic), and common symptoms).

It automatically classifies the miasms into Psora, Sycosis and Syphilis, Latent Psora, Latent Sycosis, Latent Syphilis and their remedies.

7. ORGANON 96

This is the software prepared by Institute of Clinical Research (ICR) Bombay, Mumbai. **Dr. Dilip Dixit** worked for the development of this software. This is a sort of processing software where case taking, data processing, analysis and evaluation of symptoms is possible. This software contains standardized case record (SCR) that is used at Dr. M. L. Dhawale institution. The STANDARDIZED CASE RECORD (S.C.R) has been utilized to facilitate accurate recording, analysis and synthesis of the case. It has reduced difficulties of the S.C.R like manual processing and the problems of storage.
