YOGA - HOLISTIC APPROACH

The rhythm of heart, melody of mind, harmony of soul is yoga. The activity which gives happiness, relief, peaceful mind is nothing but yoga.

Yoga not only means inclusion of various types of asanas. No doubt, our mind is part of yoga with various other curative activities included in it. Gymnastics, Aerobics, etc. are branches of yoga. Yoga is field which gives benefits to the whole human body thus it is considered as holistic, as holistic has its word meaning whole. The simple reason why it is considered as holistic is it acts on whole body simultaneously. In Yoga all organs becomes activates. Thus the actions are corresponding throughout body.

Meditation one of the fabulous branch of yoga. It is best at all levels. From head to toe each organ, bone, joint, muscle, etc. are engrossed successfully during meditation.

Yoga may not make us feel happy all time but the discomfort felt by human is surely removed by yoga. Yoga is skillful art which needs practice for getting healthy and luxurious life ahead. Though we all don't bother about it much but it is the only life saving exercise at particular stage.

As yoga deals with various organs as enlisted above i.e. whole body i.e. hands, nose, ears, mind, etc. including during this exercise. Not only these, the main vital we called as soul-spiritual power, dynamic power is important part and power of the exercise. Thus, it is rightly said Practice it and all comes to us.

* As it is truly said every coin has two sides. Similarly, each and every object has boon and curse. Let's talk about advantage first. Various infinite advantages of yoga are there. Few like can be practised easily, regularly, anywhere. Thus, it is not a time consuming event. Even no more costly apparatus are required hence it is cost effective. All muscle exercises during the yoga even there are some disadvantages. It may not just total relief as required but fitness is definitely achieved.

The sun shines, shadows are formed,
shadows are reflected -

Reflections of thousands of shadows
from same mirror -
yet apparent dissimilation.

This is what same regarding yoga. Different types of yoga, yet we don't know, but if we understand all that at once success comes towards us.

"Yoga does not remove us from reality or responsibilities -

But rather places over lot firmly in the practice of ground -

Even walking, running, jogging is included in yoga. Yoga is actually an Indian culture activity, desired in ancient by various saints for peacefulness, but its going to see it propagating throughout world in abroad. Western people separately remove spare time from their busy working schedule for meditation and various reasons performing.

I would like to say one fact news which is related with my life. In childhood days, during school life as my school was in collaboration with British council, a yoga health session was arranged in which our school representative wholeheartedly投入 in session by making video clip of various asanas and demonstrating it with its description in front of foreigners.

This has been experienced, not to share on your writing as it is of great important and respect otherwise no would.

"Become peace and make rest others peace" is possible only and only by yoga. The most fruitful thing can be obtained by yoga. As yoga maintains concentration, mood changes etc. it is one which is responsible for making our health perfect. The most important thing is - yogis should be performed in early morning and with empty stomach. Even before dinner. Yoga keeps one human mentally as well as physically fit.

Laughing is also one of the best part of yoga. Laughing carelessly and loudly gives exercise to deep muscles of body which gets energetic and activates more in function. Thus, laughing is called as best medicine.

True meditation is about being present with everything that is - even including discomfort and challenges. Thus, after refreshness many challenges can be easily tackle without any disturbances. The mind, the soul becomes activated thoroughly; because of meditation.

While performing various yoga one must follow that over stretching may affect their body. While performing and maintaining requirements, flexibility increases accordingly.

Final words that each one should keep in mind is - It is the art of which life comes from centre with full of grace and power acting wholly on body.

ॐ शं शोऽना ।

जो लोटस का पानी,
वृत्तश्च रहेता हो छानात् ॥

ॐ शं शोऽना,
जियो नहीं न जियो की जाति न जीया ॥

Thanking You !!!

YOGA FOR HOLISTIC HEALTH

Yoga is a system of exercises
practicing in the Hindu discipline to
control the body & mind. The yoga
maintains the equilibrium between body
& mind.

Yoga = To join, to yoke, to unite.
Yoga has Sanskrit root which means
to join, to yoke, to unite, union.

The yoga has originated thousands
of years ago by Indu Saraswati
civilisation in the north India.

One can be say's that
yoga maintains the mental & emotional
capacity. One can be say's that
perfect state of health when physical
fitness, mental & emotional well being
mentally calm & emotionally steady.
"Sri Sri Ravi Shankar says that"

Beyond just physical fitness yoga
strengthens mental & emotional capacity

Fitness is also about being able
to handle changes in life which
might be good or bad the yoga is
the only one with which we can
get the ability to handle all these
things.

Yoga keeps us healthy on different levels of body, breath & mind or of our existence. It increase our workout capacity. It bring us to increase the working property. The exercise such as pranayam from which we can get lung capacity. It makes our blood pressure maintained normal. Yoga keeps our posture calm & kind. meditation will help to maintain the body steady & will keep us very normal. It strengthen the body. yoga help to calm the mind when high & low times are there at different time. with the yoga will help to make mind peaceful, better & intellectual.

At certain time the situation comes that we expect something different & the result is just opposite to that. That time the reaction comes that is anger. but how much last anger? it just depend on the situation or it is like a fine line drawn on a surface of water. like for previous days, months or years ago, the meditation will help but the, the mind suffers, meditation will help but the pranayam, sudarshan kriya & yoga are the answers. the yoga people anger last for a very short time & is not last for a longer time. the body, mind & emotions keeps steady. Yoga is the best answer for all the questions.

In today's pay to day life there is lot much of pollution we can't get the hygenic weather. yoga is the best way to keep calm & for healthy & holistic health.

'Suryanamaskar' is also a very good source for healthy life. yoga keeps us flexible, it makes mind fresh, it helps in loosing fat. It maintains blood pressure. some pop peoples are very much angry for their anger control the yoga is the best way. It filters our blood, fullness, dizziness all thing can be removed by yoga.

yoga is the root of all diseases. If you are doing yoga no disease can't touch even touch you.

yoga is the best answer to all questions.

The diseases like diabetes, asthma, joint pain can be removed by daily yoga. But the way to do yoga should be proper. It keep physically fit, mentally calm & emotionally steady.

There are various type of yoga like "Suryanamaskar", pranayam, "Asana", "Kapalbhati". There are variety of yogis. Baba Ramdev is the best guru of yogis there the way to do yoga we should learn from the best teacher that is Baba Ramdev.

The word yoga is mentioned in oldest sacred texts i.e. Rig Veda, yoga is group of spiritual, physical & mental practices or ancient discipline which are originated in ancient India.

The word yoga comes from sanskrit root *yuj*. yoga is ancient art based on harmonizing system of development for body, mind & spirit. the continued practice of yoga will lead to sense of peace & well being.

Traditional yoga has been long used for to manage blood pressure treat depression & anxiety & help maintain or gain strength after prolonged illness or injury lately more & more people looking to yoga therapy to treat specific ailments such as back pain, neck pain, hip pain, sciatica.

Many people take up yoga to enhance health & to heal from injuries. yoga helps regain strength & flexibility of motion after injury.

Yoga is best for often people of chronic lower back pain after long time.

Many medical practitioners still consider yoga to be complementary therapy to alongside regular physical therapy & medication.

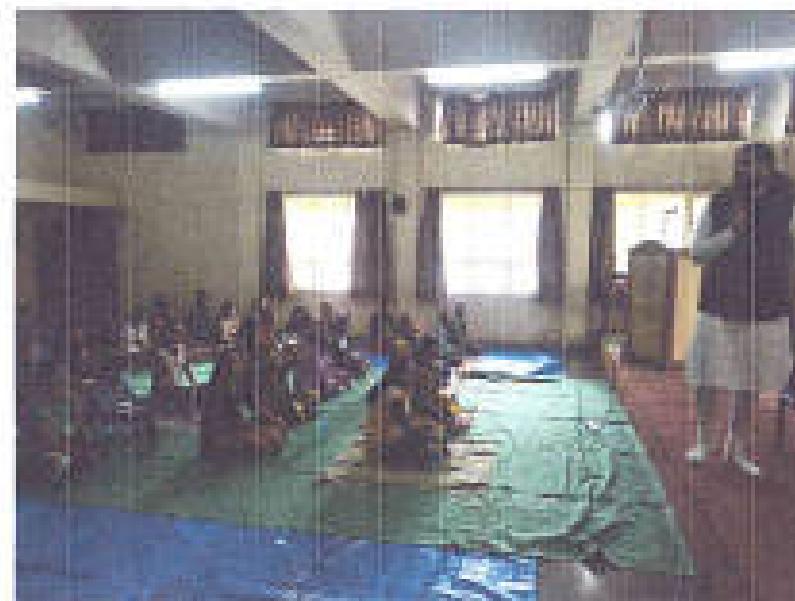

Yoga is a holistic discipline that uses the power of the mind to assist in healing. This is important because regular physical therapy & medical therapy does not not address

The word is therapy which is most useful.
