NATIONAL INTEGRATION

India, A country of wide diversity, varied numbers of communities, varied numbers of people and a bond so called LOVE, which binds these all diverse people.

Around 140 crores of Indians daily chant the beautiful "Jana Gana Mana" as a national anthem of our country. This anthem, brings the sense of unitedness in the hearts of each and every single Indian, and hence India is known for the quote i.e., UNITEDNESS IN A DIVERSITY.

But, like a clear water, inspite of purifying, will contain some amount of IMPURITY, there are also some people in our country who try to violate this nation's PEACE. Around 75 years has completed since our Nation got the independence, we say we got Freedom, but does it really gets reflected in the hearts of Indians? Yes, BUT not everytime. This is where our country has stayed for such a long period in a status of DEVELOPING COUNTRY otherwise we could have become United States of this

World, a long time before.

Every Now and then, Every Morning whenever you look into the Newspaper, News channel, Internet, There is pretty surety that you will find a group of Community violating the peace and contentment of the other. These leads to different communal riots and Everyday, Number of people die, and Number of families become Helpless, and this is not acceptable in any ways.

Everytime IF people will think that they belong to this and that community, Everytime they will say our Community is best than others, then they are violating the peace and Integration of this other Communal people.

Such people, who are not obeying the peace, become the criminal faces to the society, and such thing will not be Entertained in a country like India. People of Different communities, religion, Caste, or any other grounds, should learn to say -

"We are one amongst the best" instead of saying "We are best than others"

IF this communal riots, fights, destruction continue, we will never be able to see this tag line that "India is a developed country." We will always stay Underdeveloped or Developing countries, IF we want to see our country leading the world, then we ourself need to take these steps towards development towards peace, towards Permanent Society.
