VARICO-CITY

Definition: It is when a Vein becomes Dilated, Elongated & tortuous.

Aetiology & Pre-disposing factors:

- a) Primary → Due to valve defect
- b) Secondary → Venous obstruction
- c) Congenital

Due to various Etiology & Risk factors:

- Pregnancy
- Menstruation & Periods
- Obesity
- Standing posture
- Occupational
- Carrying
- Prolonged Standing
- Diet
- Cold
- Old age
- Athletics
- Various postures

Enlargement of vein in leg → Stretching of valves & it becomes incompetent → Back flow of Blood → Increased back pressure (as muscle pump fails) → Venous dilatation & Oedema.

Normal Vein (a) **Varicose Vein** (b)
