### Learning Management system

Learning management system is software application or web based technology used to plan, implement and assess a specific learning process. It comprises of E learning practices.

In our institute till academic year 2020, software – **course management system (webguru)** a web based technology was used for e – learning process. Through which, faculties used to provide assignments, course contents, do announcements, chat, and discussions with the students. Students used to submit their assignments in offline mode and can check their submission status & grades through webguru.

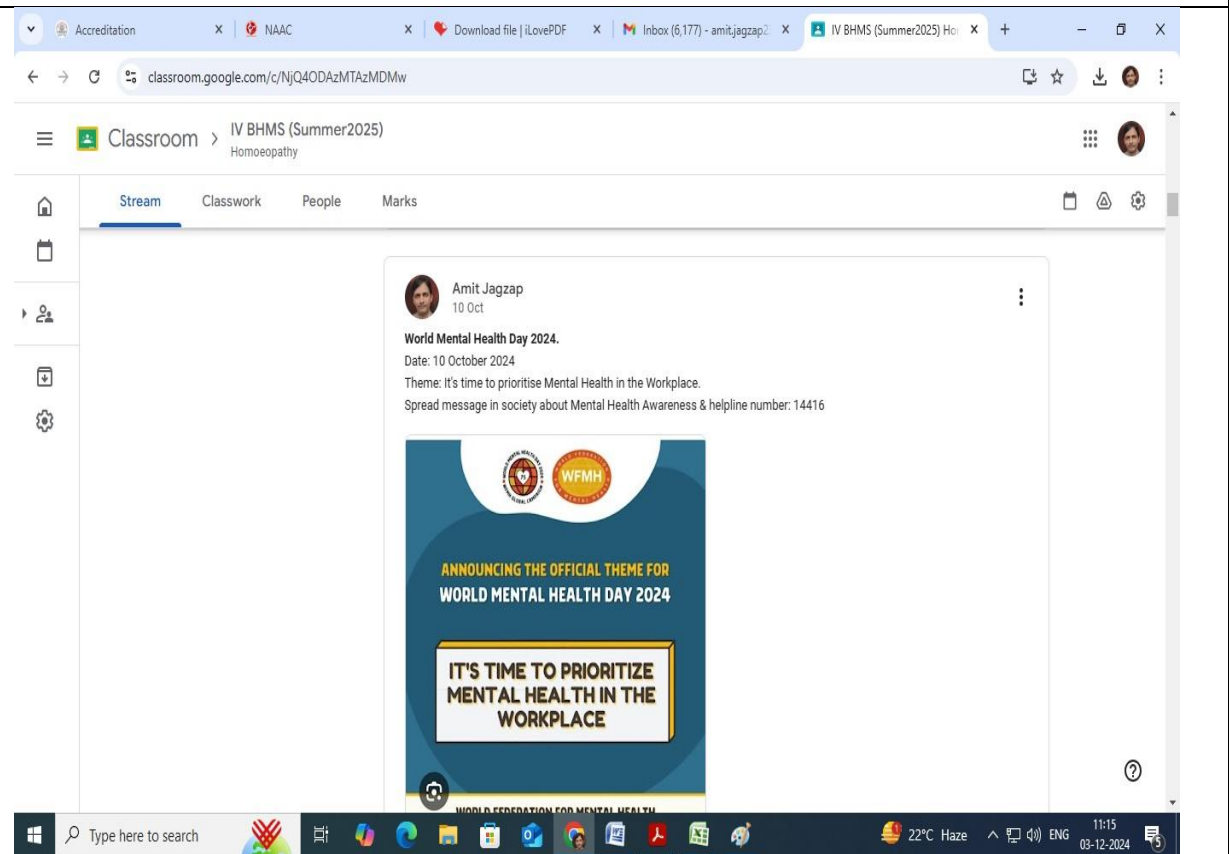

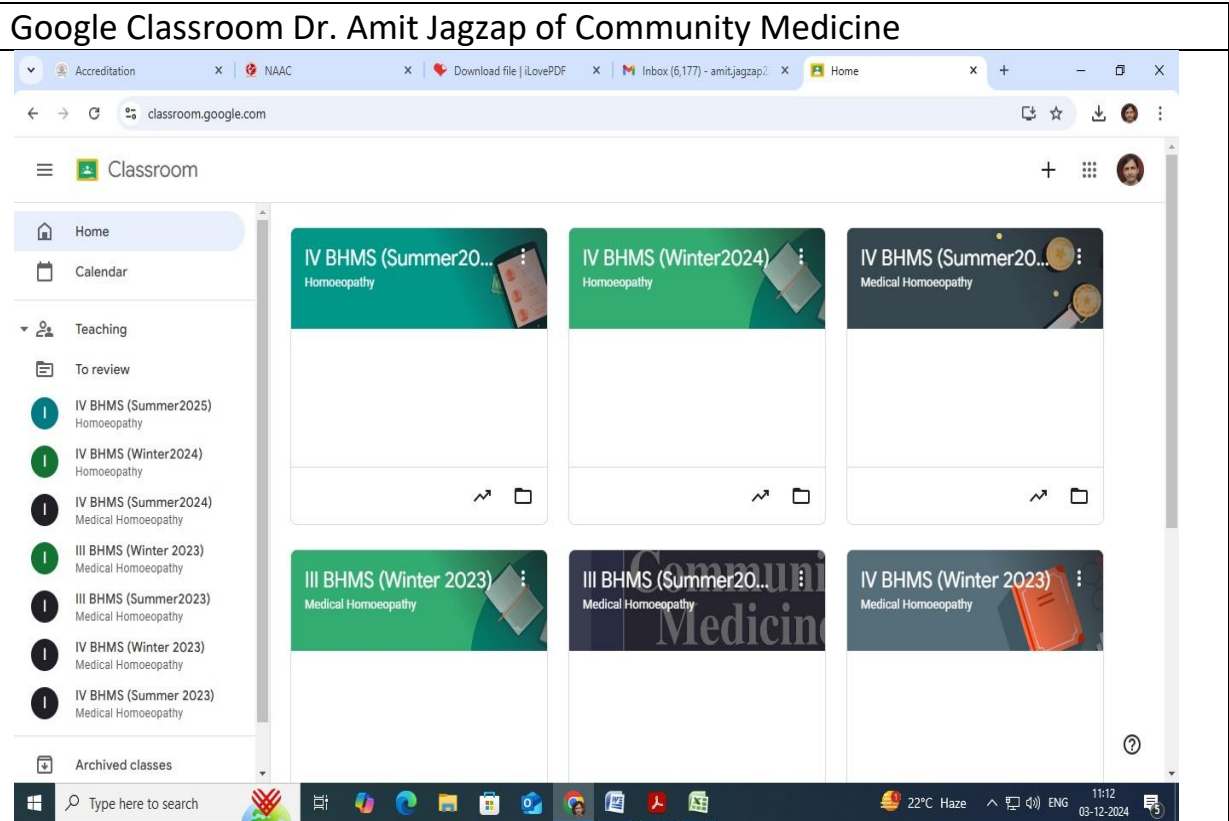

From academic year 2021 onwards, **snjbliveacademiaerp.com** web link is used for the same purpose also used for recording of attendance of the students. Parents/ guardian communication is also possible through it. **Google classroom** is created by the faculty for providing academic schedule, syllabus, question paper pattern, study material & doing announcement of activities, assignments etc. This helps to make learning process effective and convenient to all.
