Learning Management system

Learning management system is software application or web based technology used to plan, implement and assess a specific learning process. It comprises of E learning practices.

In our institute till academic year 2020, software – **course management system (webguru)** a web based technology was used for e – learning process. Through which, faculties used to provide assignments, course contents, do announcements, chat, and discussions with the students. Students used to submit their assignments in offline mode and can check their submission status & grades through webguru.

From academic year 2021 onwards, **snjbliveacademiaerp.com** web link is used for the same purpose also used for recording of attendance of the students. Parents/ guardian communication is also possible through it. **Google classroom** is created by the faculty for providing academic schedule, syllabus, question paper pattern, study material & doing announcement of activities, assignments etc. This helps to make learning process effective and convenient to all.

Google Class Room

The screenshot shows a Google Classroom interface for a class titled "1BHMS 2022-23 PHYSIOLOGY AND BIOCHEMISTRY". The page is viewed from the "Stream" tab. On the left, a sidebar lists various classes, with the current class selected. The main content area features a header banner with a book and glasses, a class code "wg5ip5r", and an announcement by Mukesh Parewal dated Jun 16 regarding "regulation of blood sugar level". A YouTube video titled "Regulation Of Blood Sugar..." is embedded in the stream. The bottom of the page shows a Windows taskbar with the date 07-11-2023 and time 11:36.
