Sample quality: enough

Analysis status: pending till 26th Jan, 2019

Comments: The samples are dried enough.
The spectrum should be obtained at operating temp.
below 25°C and humidity below 50%.
Kindly obtain 2 spectra of each sample
1) 4400 - 665 cm^{-1} and other 2200 - 2500 cm^{-1}

Sample quality: Sufficient

Analysis status:.....on Wednesday, 20th Feb. 2019

Comments: Sample 1.8 is sufficiently dry and suitable for IR study. The Dry ~~tablets~~ Netrostol HCl appears a bit damp, hence the sample is suggested to be dried and re-inspct.

The spectra will be obtained on Saturday, 20th April, 2019. A print either soft copy be given to the student. *18/4/19*

Subject: For IR spectroscopic characterization of 15 samples

Respected Sir,

We are sending herewith 15 samples of our PG students working for their PG research projects to get their IR Spectrum from your reputed Instrumentation center. We expect the results of the characterization as early as possible. We are ready to pay the applicable characterization charges for the same.

Kindly do the needful and permit for the same. We will be very much thankful to you.

Extracts from the Patents Act, 1990

Sect 120(1A) Infringement proceedings in respect of an innovation patent cannot be started unless the patent has been certified.

Sec 128 Application for relief from unjustified threats

(1) Where a person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings a person aggrieved may apply to a prescribed court, or to another court having jurisdiction to hear and determine the application, for:

- (a) a declaration that the threats are unjustifiable; and
- (b) an injunction against the continuance of the threats; and
- (c) the recovery of any damages sustained by the applicant as a result of the threats.

(2) Subsection (1) applies whether or not the person who made the threats is entitled to, or interested in, the patent or a patent application.

Sec 129A Threats related to an innovation patent application or innovation patent and courts power to grant relief.

Certain threats of infringement proceedings are always unjustifiable.

- (1) If:
- (a) a person:
 - (i) has applied for an innovation patent, but the application has not been determined; or
 - (ii) has an innovation patent that has not been certified; and
 - (b) the person, by means of circulars, advertisements or otherwise, threatens a person with infringement proceedings or other similar proceedings in respect of the patent applied for, or the patent, as the case may be; then, for the purposes of an application for relief under section 128 by the person threatened, the threats are unjustifiable.

Courts power to grant relief in respect of threats made by the applicant for an innovation patent or the patentee of an uncertified innovation patent

- (2) If an application under section 128 for relief relates to threats made in respect of an innovation patent that has not been certified or an application for an innovation patent, the court may grant the application the relief applied for.

Courts power to grant relief in respect of threats made by the patentee of certified innovation patent

- (3) If an application under section 128 for relief relates to threats made in respect of a certified innovation patent, the court may grant the applicant the relief applied for unless the respondent satisfies the court that the acts about which the threats were made infringed, or would infringe, a claim that is not shown by the applicant to be invalid.

(57) Abstract :

The present invention is a portable storage device for carrying medicines that are required to be kept at a pre-determined regulated temperature. The invention uses a Peltier module to function as a heating or cooling component for the solid portable storage. The storage is also connected to a heat sink that acts as a heat exchanger to transfer the heat generated by an electronic or a mechanical device to a fluid medium. At the same time, a cooling fan is used to maintain and regulate the temperature of the storage device.

(57) Abstract :

A novel ethyl carboxylate monosubstituted 3H-indole compound, and derivatives thereof, were prepared as potential inhibitors of GSK-3B. The invention comprises the preparation of monosubstituted 3H-indole derivatives including diazotization of p-substituted aniline; preparation of ethyl 2-methyl-3-oxobutanoate anion; condensation of prepared hydrazones of diazotized p-substituted anilines; and cyclization of respective hydrazones; wherein the obtained esters of substituted 3H-indole were purified through chromatography and evaluated using an in vitro luminescence assay method to confirm their GSK3B inhibitory activity

(57) Abstract :
The present invention is related to a herbal confectionery formulation for oral consumption comprising one or more naturally occurring active ingredients. More particularly, the invention relates to a herbal confectionery formulation comprising Vitamin C supplement extracted from the leaves of Ambadi and Talsi having immune boosting properties and a process for preparing the same, for delivering the active ingredients. It is a tasty, delicious, palatable and effective formulation with natural ingredients and is mostly liked by children as well as adults and is a preferred alternative to immune boosting supplements available in market.
