

EXPERT LECTURES

On 23/10/2021 Expert lecture by Mr. Jagdish Aher from Siemens is organized on topic "Career Opportunity in Building Automation and Project Management". Students from SYEJ and TYEJ get benefitted.

This program coordinated by Respected Mr. N.R.Thakre.

SNJB
SHRI. H. H. J. B. POLYTECHNIC
CHANDWAD DIST. NASHIK, MAHARASHTRA
DEPT. OF ELECTRONICS AND TELECOMMUNICATION

We are organizing Online Expert Lecture on "Industrial Automation Using PLC & SCADA"
For Second and Third year students

Date : 30 Oct 2021
Time : 10 : 00 AM to 11:00 AM

Guest Speaker
Mr. Deepak Kalel
(B.E in E&TC)
System Engineer
Emerson Export Engineering
center Pune

Google Meet Platform
Join : <https://meet.google.com/qso-jmrhvjgd>

On 30/10/2021 Expert lecture by Mr. Deepak Kalel from Emerson Export Engineering Pune is organized on topic "Industrial Automation using PLC & SCADA". Students from SYEJ and TYEJ get benefitted.

This program coordinated by Mr.G.A.Arkhade.

**FAREWELL OF
BATCH 2020-21****SOCIAL ACTIVITY****Covid-19 Vaccination Campaign**

Covid-19 Vaccination Campaigning arranged in SHRI.H.H.J.B POLYTECHNIC, Chandwad on 26/10/2021 under the guidance of Respected Principal Dr.V.A.Wankhede.

**EXTRA-CURRICULAR
ACTIVITY****Quiz Competition**

Prize distribution of "Quiz Competition" by Respected Principal Dr.V.A.Wankhede. The competition organised by department on 22/11/2021 and coordinated by Mr.M.A.Nalawade.

**INDUSTRIAL VISIT'S**

On 17/11/2021 Department has organized industrial visit at ELITE Technologies MIDC Ambad, Nashik. Total 50 students get benefitted by this visit. This was organised by Mr.S.T.Patil, Mr.J.V.Shimpi & Mr.G.A.Arkhade

On 24/11/2021 Department has organized industrial visit at BSNL Exchange Chandwad, under the course Mobile and Wireless Communication (22533). Total 40 students get benefitted by this visit. This was organised by Mr.S.T.Patil, Mr.J.V.Shimpi & Mr.M.A.Nalawade.

**STUDENT CORNER****MSBTE Summer-2021
Examination****Congratulations Our Toppers**

Rank	Name of Toppers	% Score
------	-----------------	---------

FYEJ

1	NIKAM YASH N	86.63
2	BHOI UNMESH A	86.00
3	MORE SATYAM J	84.75

SYEJ

1	DESALE SAVITA V	83.33
2	RAJGIRE AKASH D	80.44
3	SHELKE KALYANI S	79.44

TYEJ

1	BORGUDE AKASH B	88.47
2	PAGARE AKHILESH A	87.88
3	BORGUDE VISHAL R	87.12

Department of Electronics & Telecommunication Engineering
Heartiest Congratulations to All Toppers OF FY, SY, TY
MSBTE Exam Summer - 2021

Third Year Toppers

Borgude Akash B 88.47%	Pagare Akhilesh A 87.88%	Borgude Vishal R 87.12%
---------------------------	-----------------------------	----------------------------

Second Year Toppers

Desale Savita V 83.33%	Rajgire Akash D 80.44%	Shelke Kalyani S 79.44%
---------------------------	---------------------------	----------------------------

First Year Toppers

Nikam Yash N 86.63%	Bhoi Unmesh A 86.00%	More Satyam J 84.75%
------------------------	-------------------------	-------------------------

गुरुकुल संस्कार एवम आधुनिक शिक्षा

Felicitatation Ceremony

Congratulations to Respected Principal Dr.V.A.Wankhede for successful win in the State Level Elections of Institute of Engineers for Electronics and Telecommunication Engineering Division

STUDENT CORNER

Students Talk....

Is online study is more effective than traditional one?

Online study has become very important now-a days. It has become a need from youngsters to senior citizens. With a click any one can access any information with various images, videos, articles & studies etc. Students can better understand the things practically than that of theoretically in the classroom. Various soft wares are developed / designed by Engineers & Scientists for a perfect learning. Students can understand the concept of any subject easily when they get connected with that subject and its real life significance or its practical approach which has nice demonstrations on any educational app, YouTube, Google, or tutorials etc. which are available online. While sitting at home one can access lot of information by just a click like news, daily updates. This age of information brought revolution in the fields of education & learning by extending the boundaries of human capabilities and learning experience. The technologies like virtual reality and artificial intelligence are proven the holy grails of knowledge. Now there is no compulsion of classrooms and institutes. We can use whole world as an institute to learn which is, the best way of learning. It becomes easier for every student to learn anywhere, anytime easily. Not only students but also others can get the benefits of online learning due to its low cost. Each and every student can learn irrespective of his/her socioeconomic backgrounds. Courses are available for students like face to face courses. Various animations are there due to which kids and children get attracted towards it. The online learning provides more joy of learning than that of traditional one, "As an intelligent being we were always despairing about future and online learning is that future". So according to my point of view online study is more effective than the traditional one.

Mr. Anuj Aher
(TYEJ)

Yes, I firmly believe online studying is more effective than the traditional one. Internet is an ocean of knowledge, everything on the www is linked with one another, whereas in traditional studying there are limitations as traditional studying is restricted to a four wall class room. Online studying is more effective as it provides an interactive GUI and students can visualize the concept and have a better understanding. Online studying puts student in a place where they can explore the world beyond paper books. Traditional studying is mainly based on theoretical knowledge. As the world is expanding so is the internet and the technology, many teachers combine both online and traditional studying and make it easy for students, schools and colleges in rural area are providing smart class rooms and cloud based study materials with internet facilities. Main advantage of online studying is that it is accessible everywhere and anywhere.

Ms. Kalyani Shelke
(TYEJ)

Yes, Online study is more efficient. At least for the learners who want to learn and grasp knowledge at anytime, anywhere without being in a formal way. Basically, studying something means learning and understanding more and more about a topic. Online studies provide students number of websites and blog Spots to get and share their knowledge. Online tutorials do not have any limitations, whereas traditional has so. Today if we have any question we just ask Google to find solution for it, like wise if we look to traditional study "We get to know the thoughts of people and get new ideas also but these ideas lasts for just few months after this, we get so much involved in those people and then we all make our minds to work and think like in similar way. This makes the new ideas to be vanished from the group". Where as in Online study we learn something, we have same conversations but here "we process our MINDS" to make study on a topic by ourselves to build questions on it.

Ms. Dhanashree Jadhav
(TYEJ)

E-learning is very essential in the present condition. We are marching towards the new technological innovations. There are incredible deviations in all walks of life. It has become possible due to technological advancement. Everything became online. Online Learning is more convenient for students; it saves valuable time, money, and energy. One of the best advantages of online learning is that one can undergo a course from their office or home. In spite of one's busy schedule, one can find some spare time to take a course or study for it. So, an online study is more suitable for them. Because virtual learning gives us a chance to make a choice. As per our interest, we select the mode of learning. But traditionally it did not happen. There was a lack of proper learning resources. Only books were a means of learning. Today we can see that online study made everything easy. We can access online book notes, videos, audios, various learning techniques etc.. Another very important advantage of online study is that one need not carry books with us now and then rather than we can access anything online as per our requirement. We need not preserve it manually. Online learning has been hugely popular in the rapidly advancing world and competitiveness. E-Learning became more convenient than the traditional one as it tempts the students to have full involvement in the learning by creating an audio-visual image in the mind.

Accordingly, there can be various benefits of e-learning:

1. Students learn more than they do in traditional methods.
2. Retention rates are higher with online learning
3. Online learning requires less time investment
4. It is choice-based so one can go for more options.
5. E-Learning is the need of time. It helps one to do his best.
6. Quick feedback is possible in online learning.

One of the most important advantages I think that online study develops discipline among the students. One can stick to time and become punctual. Good habit formation is also done through online study. If we read something it can be remembered for a long time and if we forgot we have quick access to the internet. Nowadays we have computers, laptops, smart phones, tabs, and much more advanced equipment with us to get internet access easily. From the past few years, most of the examinations are conducted online for effective evaluation and proper justice to each student. Many professionals usually join online courses to increase their qualifications and enhance their career opportunities in their jobs for promotions or higher-paid job opportunities. Through online learning, one can be updated and acquire as per requirement. Hence in my view, online study is much better than the traditional one.

Ms. Savita Desale
(TYEJ)

Now a days, online studying or learning has flourished the educational system. The technology has developed a lot during this decade. Although E-learning has been already introduced and practice in many countries, We all know how internet and Google has taken the world right now. We get each and every information about a thing on the internet. Introducing online learning will help a lot in education system and in development of the nation. Taking in consideration the traditional way of learning and the online learning would probably be the easy way to learn. Now assuming the stream of interior design, the amount of drafting and sketching would be reduced by the online learning. Now a days, AutoCAD has also taken part in interior design but the thing is the amount of grasping and understanding which is done in traditional learning would not be there in online learning. The students will understand more through online learning due to the showing and presentation of that particular object. The E learning has already came into practice so there is a lot of hope that in the next 10-15 years, the online learning and other would take the educational system to more technology and economic development of the country

Mr. Sudarshan Ugale
(TYEJ)
